

Warning

This is for everyone in the USA. I know we have VIPs here who are lurkers. If you are in any position of influence in the US government, please take notice, and try to encourage extra security and high alert.

Near, around and on 4 July, this country will be extremely vulnerable to attack. I'm not going into a long spiel here regarding the details, but malefic planets are lining up on the USA sensitive points, namely a stationary Mars of violence. I use the Gemini rising chart, which is accurate for the US. Neptune of chemicals factors in. Transiting Mercury (also the US chart ruler) will be opposite the stationary Mars of violence on the 4th, acting as a possible trigger. Moon in Pisces (chemicals), the Sun, Jupiter on a sensitive degree, stationary (Jupiter isn't always positive when combined with malefic planets), Neptune and Saturn, which is a bit out of exact orb.

US 14 degrees is very sensitive, as experienced in the 9/11.

There are many more transits, progressions and solar arc progressions, along with the US solar return that are factoring into this.

The US should be on high alert during this time, especially given the recent incident in Germany. Germany stopped an Islamic attack attempted with ricin.

Any competent astrologer should be able to see this in the transiting planets alone.

Astrology is a major help in foreknowledge. Knowing beforehand can prevent certain things like accidents from happening, by taking extra precautions for the time when planets are real bad.

Astrologically, this is potentially very serious.
