

A Slave Race

HP Hooded Cobra 666

[May 26, 2017](#)

For those people who have a farm or a family of farmers, they know, that when we have cattle, we have to mix them and breed them as we see fit, in order to produce the cattle that fills into our needs. This is how particular breeds came to be, which served us on our purposes over human history.

If we need strong cattle, we breed it accordingly to become strong. The same thing goes for dogs, cats, buffalos, horses, and lastly...Human beings.

Remember, for the enemy aliens and jews, humanity is nothing but cattle, as their top authorities admit. Therefore they want to mix it accordingly in order to produce the type of cattle that will serve them best. Preferably, the slave should be low IQ, with many many diseases and tortured by the frailest health (so that there will always be eternal dependency on the master), as morbid and as nonspiritual as it goes, strong but too weak to be vengeful, so that it poses no threat.

All the billions of the "Goyim" of the world will be exterminated, according to their plans which parade as 'divine prophecy', and only a few necessary numbers of slaves will remain, to be used as cattle in a human form.

The future of the Non-Jews in the Jew World Order, is to be Shabbos Goyim. The Shabbos Goyim are like a donkey, only they do a few things more, such as hold the carriers of Rabbis and some other menial slave tasks. That's all they exist to do, serve the jews. Therefore, the jews accordingly try to breed this particular type of lifeform.

I watched a video on Youtube, about a guy who was called "Real Life Thor", and then some about some Asian pop stars etc. Many African people like when they see some Senegalese supermodels and stuff, too. This goes beyond beauty but anyway, it's about a simpler point.

Now, all the girls in the comments, from all races, frenzied by these guys, were raving about how we need 'more of these guys' and how we need to 'clone' them even. Of course, here 'racism' is "justified". Everyone likes beautiful creations, as we also like to improve ourselves, don't we?

Everyone wants health, beauty and everything else. We like it when we see it, and even those who hate it, secretly wish it, to name a few examples. We love our pets and cats and dogs, depending on our sense of taste and beauty, and because they are beautiful and friendly to us, for example.

But unless someone comes and says, hey guys, let's make it a rule. Let's go ahead and give people better and more optimal health, then people lose their minds from it. While

all their existence, they are going after these very things. The only bad the person in question, Hitler, did here, was that he emphasized this for Gentiles. This was unacceptable to the Rabbis.

Where would the Jews be if all Gentile people in the planet tried to breed their best, become healthy, live close to the earth, stick to their kind, and rise on a higher spiritual level? They would be all driven out. The enemy knows this.

Meanwhile the enemy carries the longest eugenics program since Ancient times. That of breeding their spiritual caste, their Rabbis, and also their infiltrators to other races. They are doing eugenics and deliberately carrying this process. At the same time, they also practice reverse eugenics on the Goyim, making them constantly worse of a stock, always worse in their mix, and the list goes. This is pure evil right here.

Satan has told me more than once, that the higher aim of this whole bastardization process, is for when this 'one race' of slaves will be generated, then the enemy will come in, take over, and turn humans into a fertile battery of breeding low level slaves, and then with cloning and DNA technology that is extremely advanced, turn them into greys.

The greys are known to have fallen victim to this by the reptilians, and it's the same mode of operation they use on all planets, let alone, with 'advanced technology' they are completely controlled.

This really doesn't have to be the future of humanity. There are so many better things to do, and so many wonderful things humanity can do to improve itself. Notice how all improvements that humanity tries to make, actually do boil down to issues created by the enemy, that we could have prevented and corrected long ago.

Now people would be practicing spiritually, have a world without, or hardly any hunger, and the blueprints of life would have been advancing. Instead, there is a constant regression happening, with the Jews using betterment as a carrot only to lead people to worse problems.

By self-meditation and self-correction, plus spiritual warfare, these things can really be offset. Don't grow desperate on any such situation, or just work. We don't have to be perfect, this is the state of humanity as it is, but we have to strive for betterment.

We are literally fighting for freedom. If you look around, so many people have fallen into being slaves, and lower than that. This affects us too in so many ways.

We can help change this, by treating the problem at the core.
