

Europe's Burning

Migrant terrorism has become normalized across Europe further as Europe literally burns. Right now the migrants invading are burning the areas they are temporary contained within. But we can see the future of Europe as they spread out into the already immigrant dense regions of Europe as it's already occurred and has become a yearly event....

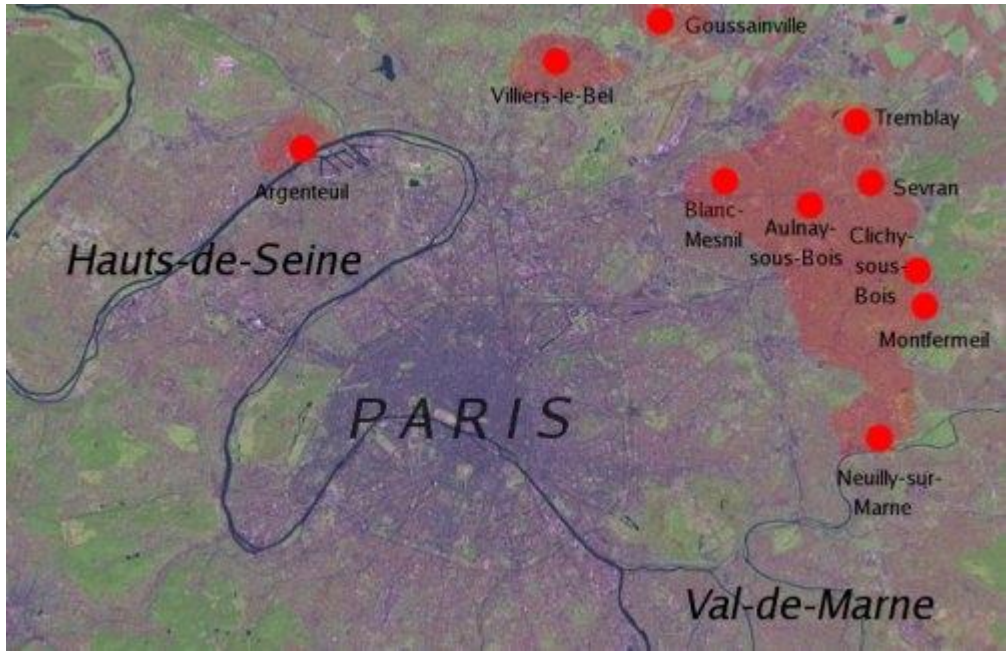

The immigrant riots in Britain staged in the major migrant communities burned down whole regions of cities and unleashed a violent crime wave right out of its inferno. Which targeted the native White citizens solely. The local Whites organized their own racial defense forces to protect their communities and push the migrant terrorist race mobs back as the Police were helpless to do anything...

This was a major reason Britain wanted out of the Jewish run EU:
topic12011.html (Old forums. The broken link is only here for reference.)

Now onto France which has been forced to absorb some of the largest immigrant waves. The violent riots in France have become normal. As the migrant mobs terrorize the White population openly on racial grounds, whole regions of migrant Europe are openly no-go zones for Whites.

Paris bathed in flames.

Sweden, which is overwhelmed by migrants from the third world, like Britain and France, has exact same problem. The larger migrant populations have regular uprisings against the native White population.

Stockholm riots leave Sweden's dreams of perfect society up in smoke

The terrorism that is being contained in the migrant camps, once unleashed will ensure that Europe burns annually till nothing is left to destroy.....

Calais 'jungle': Migrants set tents on fire as riot police attempt to evict them
