

Satanism

The point of Satanism is to cultivate a supreme spiritual order of life that is the super-conscious revelation of the divine order of the cosmos as they manifest through the laws of nature. AN ORDER of life upon the very underlying transcendental mechanics of eternal existence. Where the inner life of the soul will be realized perfection in harmony with the cosmos.

Today we call this National Socialism in exoteric, political form.
One day it will just be known as Satanism.
